1 Roll, 1 in x 25 ft: HD-MTAPE

Features

- Strong, 2-sided adhesive tape for immediate adhesion.
- 1-inch wide tape fits most interior molding widths. No trimming saves time.
- Quick & Permanent set up.
- No-messy application. No caustic adhesives to handle.
- Roll size minimizes waste and stores easily in a toolbox.

Surface Types

- Wood
- Concrete
- Laminate
- Rubber
- Vinyl
- Metal
- Subfloor
- Patch

Environments

- Residential
- Commercial

Additional Product Information

- Peel & Stick.
- Immediate adhesion allows for fast installation time.
- Ideal for flooring transition trims, starter plank floor rows, baseboard application, other interior moldings and trims.
- 1" width fits 85% of moldings without trimming.
- VOC Free for a healthier environment. No toxic odors.
- Minimal skill, no power tools and no nails or screws required.
- Roll Size: 1 inch wide x 25 ft long

Directions for Use

Coverage:

- maximum 25 lineal feet depending on width of materials being bonded.

Application Directions: Remove dust and debris from both surfaces that will adhere together. Cut Molding Tape to required length. Adhere tape to back side of the molding trim by applying firm, even pressure across the length of the tape. Remove paper liner then carefully align and position molding with adhesive side facing material to which it is intended to stick. Press firmly in place along length of molding.

Tip: Before removing paper liner from tape, do a dry run of positioning molding to check for desired fit. Once adhered, molding tape holds permanently.

Details

- Permanent bond.
- Outstanding strength.
- Double-sided tape.
- Polyurethane modified Acrylic Adhesive.
- Roll fits in toolbox.
- No VOCs.
